

LOGIN PAGE

The user signs in or creates an account using email/password or social authentication to access their independent business data.

- **Email / Password text fields:** Focuses the keyboard for typing credentials.
- **"Forgot Password?" link:** Navigates to the password recovery screen or triggers a reset flow.
- **"LOGIN" button:** Authenticates the user and navigates to the Master Order Board.
- **"Continue with Google" / "Apple" buttons:** Initiates third-party OAuth login.
- **"Sign up" link:** Switches view to the registration form.

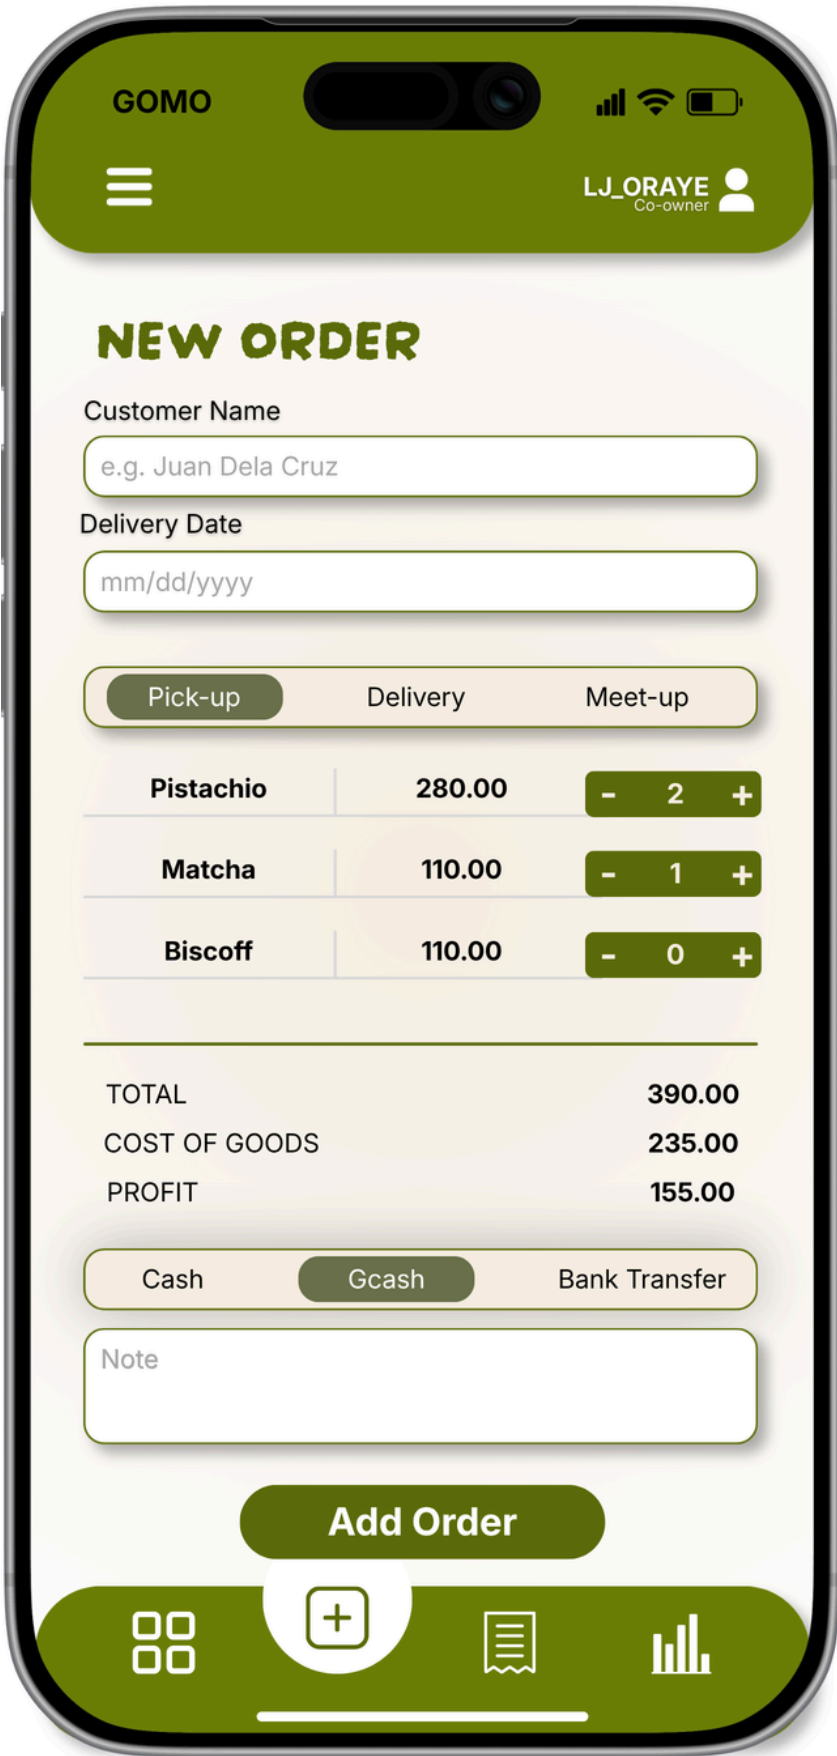

ORDER BOARD

The user views, searches, and filters all customer orders, checks payment statuses, and initiates new orders.

- **Hamburger menu (Top Left):** Opens the navigation/settings drawer.
- **User profile / Avatar (Top Right):** Opens profile or account settings.
- **Search bar:** Filters orders in real-time based on customer name or items.
- **Filter chips ("All Orders", "Pick-up", "Meet-up", "Delivery"):** Narrows down the list by fulfillment type.
- **" + New" button:** Navigates to the Order Entry Form.
- **Edit icons on order cards:** Opens the editor for that specific order.
- **Bottom Navigation Bar:** Switches between core tabs (Dashboard, Orders, Expenses, Financials).

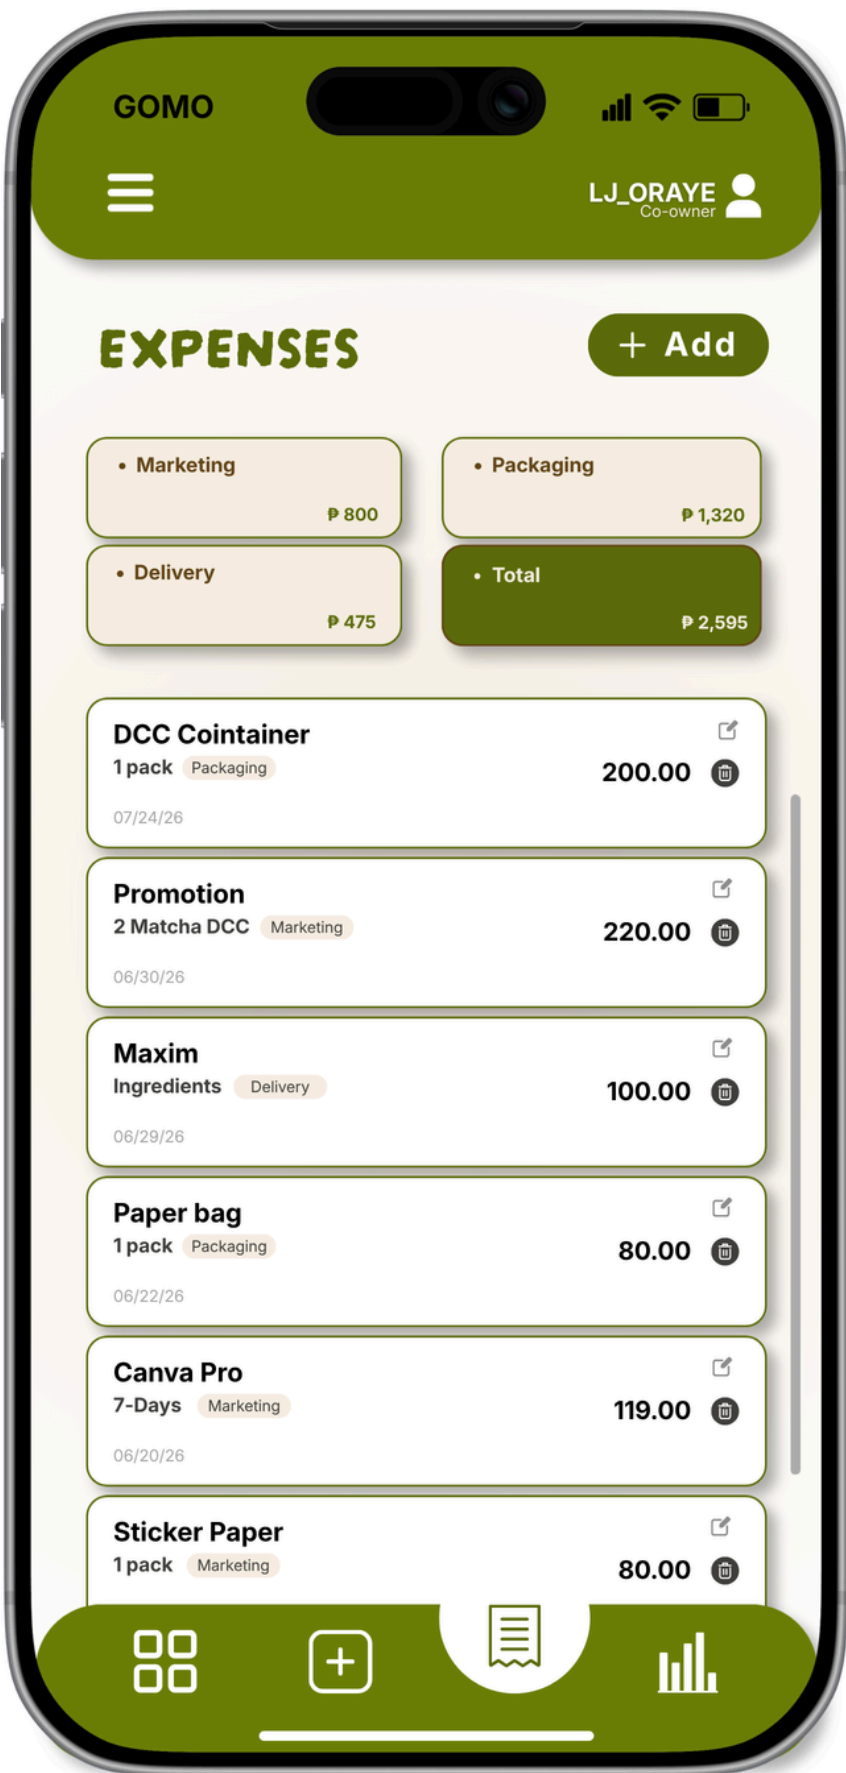

ORDER ENTRY FORM

The user inputs customer details, selects product quantities, sets fulfillment options, and saves a new order.

- **Customer Name & Delivery Date fields:** Opens keyboard and date picker.
- **Fulfillment chips ("Pick-up", "Delivery", "Meet-up"):** Selects how the order will be fulfilled.
- **Quantity selectors (+ / - buttons next to Pistachio, Matcha, Biscoff):** Increases or decreases item counts and dynamically recalculates total price, COGS, and profit.
- **Payment mode selectors ("Cash", "Gcash", "Bank Transfer"):** Sets the payment method.
- **"Add Order" button:** Validates inputs, saves the entry to Supabase, and returns to the Order Board.
- **Bottom Navigation Bar:** Switches between core tabs.

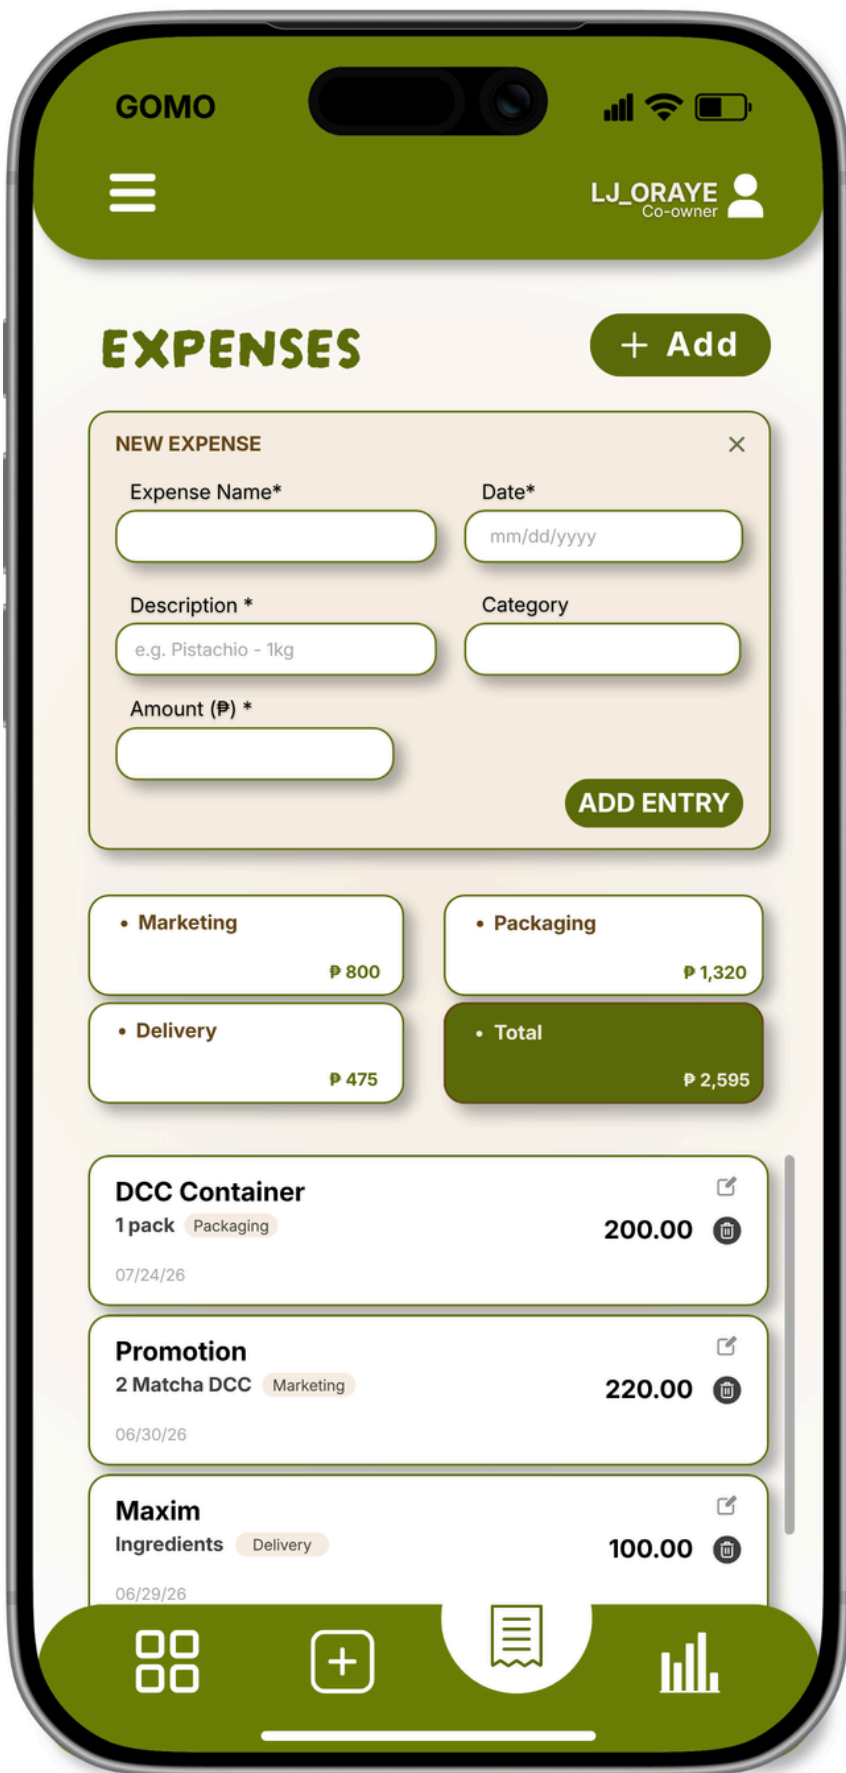

EXPENSES LOG

The user monitors business expenditures categorized by marketing, packaging, and delivery, and opens the pop-out modal to log new costs.

- **“+ Add” button:** Triggers the New Expense Pop-out Dialog
- **Edit icons on order cards:** Opens the editor for that specific expense.
- **Trash/Delete icons on expense cards:** Deletes the selected expense item and updates summary cards.
- **Bottom Navigation Bar:** Switches between core tabs.

ADD EXPENSE

The user adds a specific description (e.g., package weight or item brand) and selects the expense category.

- **Enter Expense Details:** The user types the expense name and date into the text fields.
- **Provide Descriptions and Category:** The user adds a specific description (e.g., package weight or item brand) and selects the expense category.
- **Input Monetary Value:** The user enters the exact amount in pesos into the amount field.
- **Save or Cancel:** The user taps "ADD ENTRY" to validate and save the new expense to the database, or taps the X close icon in the top right to cancel and dismiss the pop-out without saving.

FINANCIAL SUMMARY

The user reviews high-level business metrics including net profit, monthly revenue/expense trends, and top-selling products.

- **Summary cards (Net Profit, Revenue, Expenses, Margin, Paid/Unpaid orders):** Static data displays summarizing financial health.
- **Monthly Trend chart:** Visual breakdown of historical performance by month.
- **Top Ordered product cards:** Displays best-performing items.
- **Bottom Navigation Bar:** Switches between core tabs (currently highlighting the Financials tab).

What changed, and why

Screen of Element	The wireframe assumed	The mockup shows	What I will change
Login Page	Generic layout placeholders for elements	Full brand identity with custom typography, the Cookie Bites logo, and specific OAuth buttons	Retain the branded components and clean up spacing for responsiveness
Order Board	Basic boxes for order records and search fields	Real-time search filters, status chips, and active item pricing in pesos	Keep structured data cards and add quick-action indicators for faster updates
Order Entry Form	Standard static rows for adding items	Interactive quantity counters with live calculation for total cost, COGS, and profit	Maintain real-time calculations and simplify fulfillment chip selection
Expenses Log & Add Expense	Simple category blocks and plain text lines	Organized category summary totals and a complete pop-out entry modal	Keep the pop-out overlay form clean with direct inputs for expense name, date, and amount
Financial Summary	Abstract shapes for metrics and charts	Exact net profit figures, active monthly bar charts, and top-ordered product cards	Preserve the visual card hierarchy to clearly display high-level business health
